

DONATION BY RUGGERO RANIERI

This is a special collection of 1032 documents from the private library of Professor *Ruggero Ranieri*, the Foundation's President. It comprises materials on various topics: history, philosophy, politics and economics. There are two main nuclei. The first one is a collection of materials (photocopies of articles, monographs, etc.) dating back to the 1970s and gathered during the research work for the graduation essay discussed by Prof. Ruggero Ranieri at the University of Florence, with the title "Political and Ideological Origins of the Action Party". The second nucleus of material was gathered during the 1980s and deals mainly with issues of foreign policy concerning the doctoral thesis discussed at the European University Institute in 1988, by the title: "Expansion under the test of negotiation. Italian Industry and the Creation of the ECSC 1945-1955".
